

## **A Plea for Clean Water**

Water for you  
Water for me  
I'll end up paying for it  
Others want it for free

I like my water  
Stone-filtered from melted snow  
And straight to my tap  
That's my "H-to-Go"

We're doing our best  
To save what little we use  
This is one trickle-down effect  
That's open to abuse

The way you must judge  
This plan that you see  
Please take into account  
Flow-on costs to you & me

How we'll be judged  
By our children and their own  
Is not the wealth we'll create for some  
But the state of our home
