

Ray Mayne Hose and Fittings Ltd

is your **FIRST** choice for
Ecan authorised water meter installation

WATER METERS

.....

SIEMENS

Recently Ray Mayne Hose and Fittings Limited have become Ecan Authorised Water Meter Installers. As a result of this, key staff members have attended training seminars hosted by approved suppliers of water meters and associated data logger equipment. Our staff is now approved to install all types of Ecan approved water meters.

There are quite a number of different types of flow meters available. For truly independent advice and help in choosing the flow meter and associated equipment that is right for you, contact our office. We will help you through the process in deciding which flow meter is best suited in your application. There are many technically advanced systems available at quite reasonable prices. Mechanical flow meters are still able to be used but have less technical features than the more expensive electronic type.

Ray Mayne Hose and Fittings Ltd

are here to service all of your
irrigation needs

Ray Mayne Hose and Fittings Ltd is a privately owned irrigation company based in Ashburton, Mid Canterbury. The company was formed in 1991 by Ray and Noeleen Mayne and currently employs 18 staff. Ray has been involved in the irrigation industry since 1981. We are a company that specialises in irrigation design, installation, manufacture and importing of irrigation equipment. The company has a large client base throughout New Zealand.

Ray Mayne Hose and Fittings Ltd is the New Zealand importer of Reinke irrigation equipment from the USA and importer of Snap Tite irrigation hose products from the USA and Europe. We manufacture the TurboRain brand of large travelling linear irrigator, and are a distributor for the Pleuger range of Submersible Irrigation pumps through Flowserve Pumps Ltd.

We have a number of dedicated staff members who are responsible for irrigator maintenance, PVC pipe install and maintenance, submersible pump and surface pump installation. We have a specialised

centre pivot spanning crew who assemble the centre pivot and lateral move irrigators. Key centre pivot service crew have attended extensive specialised factory training in all aspects of maintenance of centre pivot and lateral irrigators.

Bruce Kell is the senior sales and design engineer who has had many years experience in designing irrigation systems for all types of irrigators.

Vaughan Brooker is now involved in sales and is also responsible for the correct installation of flow meters and data loggers. Vaughan has attended a number of training seminars conducted by various suppliers of water meters and associated equipment.

Mark Wilson has recently joined the team at Ray Mayne Hose and Fittings as Service Manager. He will also be responsible for all PVC pipe installation and repairs. Contact Mark on 027 433 4740.

Ray Mayne Hose and Fittings Ltd carry a large range of irrigator and general irrigation spare parts at our Ashburton facility.
