

Water Take Telemetry

Providing state of the art telemetry and compliance reporting for irrigation systems nationwide. In addition to irrigation, Baycity provides a full suite of weather / environment monitoring and reporting applications. Baycity's telemetry systems enjoy unrivaled security and stability.

Telemetry costs from \$49.95 +GST per month which includes:

- Unlimited text and email alerting
- Configurable alerting for each site
- Web based reporting – all site data is available on a password protected site for your information
- The ability to generate Resource Consent compliance reports easily and efficiently.

Weather Stations and environmental monitoring stations also available.

Telemetry Loggers

Our telemetry devices are designed and assembled in Christchurch and as such are developed specifically for New Zealand conditions. Our telemetry devices delivery the following:

- Multiply season data storage capacity using non volatile flash memory
- Multiple sensor input allowing not only irrigation data but also environmental data to be collected and transmitted
- Rugged construction
- Mains power and solar power options available.
- Competitively priced starting at \$599 +GST

Installation

Baycity operates a network of installers throughout the length and breadth of the country, so you'll experience local installation, service and repairs in a timely and friendly manner. As an opening special to Rakaia Selwyn consent holders – purchase 24 months of telemetry services before the end of 2009 and receive the first two months free.
