ECan Authorised Water Meter Equipment Supplier.

Providers of high quality mechanical and magnetic water meters with approved data logging devices. Local support and stocks available in Christchurch.

Mechanical Meters

- ✓ Low capital and installation cost
- ✓ Future recalibration by fitting pre-calibrated internals (no need to remove entire meter for volumetric lab testing)
- ✓ No power supply or battery maintenance.
- ✓ No meter earthing or vibration protection required
- ✓ Short install length with only 3 x D upstream and 1 x D downstream, straight pipe required
- ✓ Meters with no straight pipe requirements before or after meter are available.
- ✓ We can pre-fit and pre-wire pulse output for remote logger
- ✓ We can supply, preset and programme approved data loggers for local, or off-site data manipulation.

Magflo Meters

- ✓ Magflo meters are well suited for poor water quality applications
- ✓ Sensus and Siemens MAG 8000 and MAG5100W Magflo
- ✓ We can supply, preset and programme approved data loggers for local, or off-site data manipulation.
- ✓ Mains and battery powered options available

Available Models:

BERMAD TURBO BAR WP:

Flanged class "B" Irrigation Bulk Water Meter
Available in sizes 50mm – 300mm
Reed pulse options available.

MADDALENA DS-TRP:

BSP class "C" multi-jet turbine meters
Available in sizes 15mm – 50mm
Reed pulse option available.

SENSUS Meistream WPD IR:

Flanged, Precision class "B" irrigation bulk water meter
Available in sizes 50mm – 300mm
Reed pulse options available.

SIEMENS MAG5100W:

Flanged mains powered Magflo
Available in sizes 25mm – 1200mm
Compact or remote mounted electronics option.

SIEMENS MAG 8000:

Flanged battery powered Magflo
Available in sizes 25mm – 1200mm
Compact or remote mounted electronics option.

SIEMENS Data Puck: battery powered data logger
Suited to collection of data for off-site manipulation.

STILL-FLOWLOG: Battery powered data logger
Suited to collection of data for local manipulation
Display of instantaneous rate of flow.
