CHRISTCHURCH

Name of submitter: J. LIN
C/- Robson Garland Limited
P O Box 13-539
CHRISTCHURCH 8141

This is a further submission in support of those original submitters listed in the attached schedule. The submitter supports these submissions in as much as they relate to the use of the expanded 50 Ldn contour or the removal of that part of CN3 Greenfield Outline Development Plan area which lies inside the projected 50 Ldn contour from Plan Change No. 1, and/or the implication of a relaxation in the control of airnoise exposure over existing properties.

The reasons for support are as follows:

The 50 Ldn contour is not a recognised threshold to use for controlling land use and is not effective in reducing complaints about air noise. The 55 Ldn contour should be used for control of landuse in accord with New Zealand Standard 6805.

The adoption of expanded noise contours implies that there will be a significant alteration of the airnoise boundary at composite 65 Ldn 95 Sel (a City Plan issue) which will involve exposing more existing houses to unacceptable levels of aircraft noise. The principal purpose of the airnoise boundary is to restrict the airnoise issuing from air traffic movements to and from the airport to acceptable levels in terms of health and amenity. Levels of noise exposure to established dwellings should not be allowed to increase. This would not be allowed to occur from industrial activities and should not be allowed to happen with the airport. This lowering of standards will make an existing benign living environment an unacceptable one in which to live.

Furthermore, a downgrading of the airnoise standard (which is designed to ensure a high standard of health and amenity values) through an extension of the airnoise boundary is not permitted by NZS 6805 (Clause 1.1.4). It cannot be assumed that the changes necessary to the Christchurch City Plan, in order for it to be aligned with the proposed policy would succeed on environmental grounds.

The further submitter seeks that the submissions be allowed to the following extent:

- Retention of the contours as they are currently placed in the City Plan and continued enforcement of the current 65 Ldn contour.

- Retention of the CN3 Greenfield Outline Development Plan Area in the form shown on Plan Change 1 as notified.
- Use of the 55 Ldn contour for development control as illustrated in Map 1 Variations 1-4 as attached to those variations for information purposes (Geoff T England Updated 15.08.08)

The further submitter **wishes** to be heard in support of his submission.

If others make a similar submission, the further submitter would be prepared to consider presenting a joint case with them at a hearing.
